PART 01

The Contracts

What one tick is worth, before you size a single trade.

MARKET	CONTRACT	SYMBOL	TICK SIZE	TICK VALUE
Nasdaq-100	E-mini	**NQ**	0.25	$5.00
	Micro	**MNQ**	0.25	$0.50
S&P 500	E-mini	**ES**	0.25	$12.50
	Micro	**MES**	0.25	$1.25
Gold	Full size	**GC**	$0.10	$10.00
	Micro	**MGC**	$0.10	$1.00
Crude Oil	Full size	**CL**	$0.01	$10.00
	Micro	**MCL**	$0.01	$1.00

Every micro is one tenth of its big brother: same chart, same ticks, a tenth of the dollars.

QUICK MATHS

Tick value per instrument

NQ · MNQ	**$5.00 · $0.50**
ES · MES	**$12.50 · $1.25**
GC · MGC	**$10.00 · $1.00**
CL · MCL	**$10.00 · $1.00**

Risk = stop in ticks × tick value × contracts

Example: NQ, 30-tick stop, 1 contract

30 × $5 × 1 = $150

What a stop costs

NQ, 30-tick stop (7.5 pts)	**$150 · MNQ $15**
ES, 16-tick stop (4 pts)	**$200 · MES $20**
GC, 30-tick stop ($3.00)	**$300 · MGC $30**
CL, 20-tick stop ($0.20)	**$200 · MCL $20**
